<b>Field Description</b>	<b>Loop</b>	<b>Segment</b>	<b>Description</b>	<b>Location In Misys Tiger</b>
Facility/Laboratory Type	2310D	NM101	Entity Identifier Code	This field is automatically filled by the application. You will receive this edit if the Place of Service submitted for this location is not HIPAA approved. Review the Place of Service value being submitted for the location of this charge. Access Workbooks, Charges, enter the ticket number. Note the location entered in the Location field. Access Workbooks, File Maintenance, Insurance Company, ID Control Tab, Code Slots grid to determine the pointer for the Place of Service. Access Workbooks, File Maintenance, Location, Location Tab, Place of Service Codes grid. Note the value in the slot referenced by the Insurance Company. If this is an office or home location, the HIPAA approved codes are 11 (office) and 12 (home). If the current location for this charge is submitting another value (3 or 4), verify with the carrier that this value is still required for current claims and ask when the carrier will migrate to and accept claims with the HIPAA approved place of service values for Office & Home. If the carrier is ready to accept the HIPAA approved values, update the Place of Service pointer in the Insurance Company File to submit the correct POS value. Otherwise, do not update at this time as it may cause current claim rejections.
