

**NPI Processing Exceptions:** For the payers below, the NPI is required on all claims. However, at the request of the payers, we are also continuing to include the legacy provider ids on claims when they are sent by the provider. Most payers have requested Dual status for providers that have many legacy id's tied to one NPI. Please work with your payer to determine if the legacy id is required. Due to the legacy number not being required for all providers, the clearinghouse will not edit for the legacy id for payers in this status.
